- Heavy duty diecast housing for durability and performance

P/No. 72467

P/No. 72467W

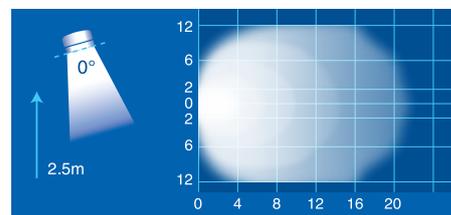

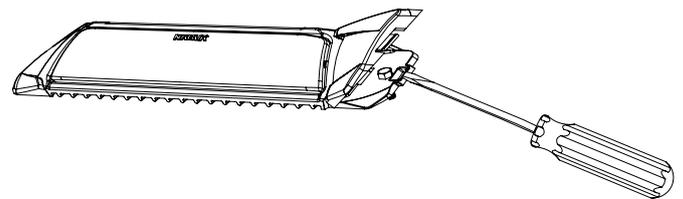

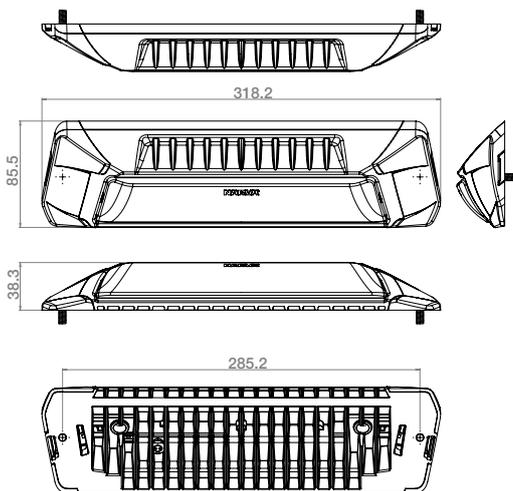

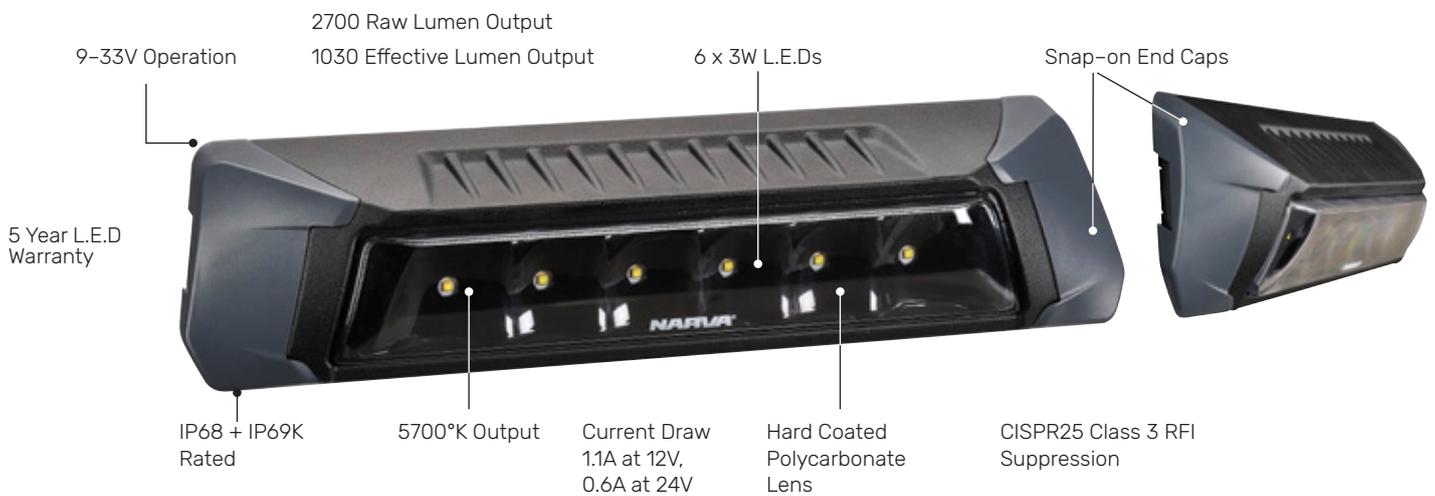

## Narva Scene Lights

Engineered for emergency vehicles the Narva Scene Lights are also ideal for a wide variety of applications including marine, emergency service vehicles, mining and construction. Featuring the highest level of RFI and ingress protection these scene lights are guaranteed not to suffer water or dust ingress or interfere with radios or other electrical equipment.

Providing a broad beam pattern with fantastic, 5700°K colour output making these lights seamless to work under. The light

is also designed so that when surface mounted it provides the optimum angle for lighting an area (40 degrees). The lights are also fully operational from 9-33V making them suitable for any automotive or marine application.

The diecast housing combined with the hard coated polycarbonate lens ensure these scene lights will not fail in harsh Australian conditions.
