

**NARVA®**  
THE VISION TO GO FURTHER

# PRODUCT UPGRADE

## L.E.D LOAD LAMP

### KEY FEATURES

- 2500 Lumen output per side
- 9-36V
- Narrow beam with glare shield for increased safety
- Diecast alloy housing for increased durability
- Fully sealed and waterproof (IP68)
- Available in right hand side or as a pair (Left & Right)

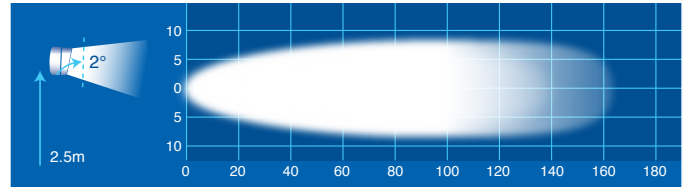

# L.E.D Load Light Upgrade

Designed to be mounted on the mirror of a truck to illuminate the side and load of the trailer. The Narva load lamps produce a powerful 2500 Lumen output with 1 LUX at 160m to ensure visibility of even the longest trailer loads.

The addition of the glare shield is a key safety feature to ensure the driver does not get distracted by glare from the lamp as they are fitted facing towards the driver. The glare shield protects the drivers eyes, allowing perfect visibility when reversing their vehicle and long load.

The most common application is to mount the lamp on the driver side mirror, this is why they are available in either right hand side (P/No. 72700-1) or as pair (P/No. 72700K) to ensure visibility on both sides.

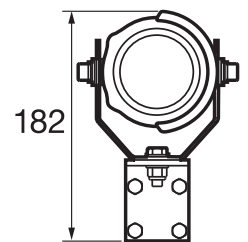

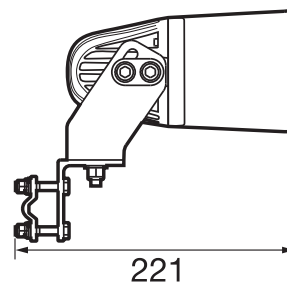

Glare shield

Virtually unbreakable polycarbonate lens

25W Cree L.E.D

Die cast alloy housing

1.6 metre cable
