illumination

Wiring loom  
included

Narva are pleased to release a new range of O.E. style sockets & switches for Toyota and Volkswagen.

### Toyota O.E. Style Sockets & Switches

Narva's O.E. style socket & switch range for Toyota has grown, with a new USB and UHF socket being added to suit a range of Toyota vehicles.

The USB has a dedicated 3A and a secondary 2.4A port. Unlike most aftermarket USBs these ports are certified and do not interfere with radio frequencies and current circuitry.

Alongside the USB, a dedicated UHF RJ45 socket has also been included to allow the user to toggle

between UHF's or range extenders where required. These are particularly useful for UHF's with channel selection functions on the hand piece, allowing the user to mount the unit completely out of eyesight.

These sockets & switches suit a range of Toyota vehicles (see table on next page) the UHF includes 60cm of RJ45 cable to suit most installations.

### Technical Specifications

**Amp rating:** 3A at 12V

**Wiring:**

Black - Earth  
Blue - Dash Light (optional)  
Red - 12V Input  
Green - 12V Output

# O.E. STYLE SOCKETS & SWITCHES
