Instructions & Specifications

CHARGING INSTRUCTIONS

- The lamp can be charged using the rechargeable docking station or directly to the lamp for charging in 240V AC mode (AC Adaptor) or 12V & 24V modes (12/24V DC lead).
- Charge the light for 3.5 to 4.5 hours before first use.
- The L.E.D charge indicator at the bottom of the lens will flash red when the lamp reaches a low charge level and requires recharging. The L.E.D will flash red for 10 minutes before the lamp will automatically turn off due to the battery being fully discharged.
- When charging, the L.E.D at the bottom of the lens will flash blue once every second. When fully charged the blue L.E.D will stop flashing and remain illuminated indicating the lamp is fully charged ready for use.

NOTE

The lamp utilises Lithium-ion batteries that have “no memory effect”. They can be re-charged at any time (no discharging required), however, the lamp must be allowed to fully charge (blue L.E.D illuminated on light) before removing from charger.

WARNING

- Before charging please read instructions.
- This appliance is not intended for use by young children or infirm persons unless they are adequately supervised by a responsible person to ensure that the light is used safely.
- Young children should be supervised to ensure that they do not play with the appliance.
- Only charge P/No. 71308 ‘PROBE’ L.E.D Inspection Light with the charging units supplied, the chargers supplied should only be used to charge this lamp (P/No. 71308).
- If any part of the unit, light, charger or cord is damaged do not attempt to charge or use. Replace immediately.
- Do not use this tool where flammable gases are present. This includes where batteries are being charged as flammable gases are produced.
- Do not use the tool outside of the design intent. Never modify the light, charger or cord for any reason or for any other use.

SPECIFICATIONS

- Batteries:** 3.7V 700mAh Li-ion
- Voltage:** 3.7V
- Charger input:** AC100–240V 50Hz
- Charger output:** 5VDC 300mA
- Charging time:** 3.5–4.5 hours
- Active life:** 2 hours
- Storage temperature:** -20° to 70°
- Operation temperature:** -5° to 50°

PARTS AVAILABLE

71389	12–24V DC Charger
71388	240V Charging Adapter
71387	240V AC Docking Station
71397	Replacement Battery Pack
