|                             |  |
|-----------------------------|--|
| Input Voltage               | 9-33V                                    |
| Beam Pattern                | Anti-glare                               |
| Colour Temp                 | Selective Yellow (3500°K)                |
| LEDs                        | 8  |
| Raw Lumens (lm)             | 6,190                                    |
| Effective Lumens (lm)       | 2,602                                    |
| Luminance Efficiency (lm/W) | 67                                       |
| Power (W)                   | 48W                                      |
| Current (A) @ 13.2V         | 3.6A                                     |
| Current (A) @ 33V           | 1.4A                                     |
| Operating Temp              | -40°C to +85°C                           |
| Housing                     | Aluminium Die Cast - Powder Coated Black |
| Bracket                     | Stainless Steel (SUS316)                 |
| Hardware                    | Stainless Steel (SUS316)                 |
| Vibration/Shock             | 21.2Grms/60G                             |
| IP Rating                   | IP68 & IP69K                             |
| Compliance                  | CISPR25 Class 3, CE, UKCA                |
| Weight (Kg)                 | 3.0Kg                                    |
| Recommended Fuse Size @ 12V | 7.5A                                     |
| Recommended Fuse Size @ 24V | 3A                                       |

DESCRIPTION

The Tremor 8 LED is a powerful, highly efficient work lamp engineered for oversized plant such as hydraulic shovels. Built to perform in the harshest environments and with Anti-Glare Technology, these lamps ensure maximum light is directed where it's needed most, without dazzling or distracting other drivers. With a Selective Yellow lens, it ensures optimal clarity in adverse conditions, particularly in dust, helping operators maintain safety and productivity.

FEATURES AND BENEFITS

- High luminous efficacy enables replacement of any mining light without re-wiring.
- Forward Rake increases light performance and vibration resistance by extending the lamp forward while keeping the trunnion fully supported.
- Rugged construction with Grilamid® lens and urethane dampener for vibration resistance.
- Above-ground electrical design prevents corrosion and stray currents.
- Ideal for oversized plant such as hydraulic shovels and service points.
